DJI TERRA

Make the World Your Digital Asset

KEY FEATURE

Key Feature

2D Maps - 3D Models

Scale: 6.000 photos/GB
Efficiency: 5.000-30.000 photos/80-21 hours
Accuracy: Centimeter-level accuracy

Lidar

Scale: 1GB raw materials/1GB
Efficiency: 1GB raw data/1 minute
Accuracy: Elevation accuracy 4cm, plan accuracy 5cm

Multispectral

Scale: 6.000 photos/GB
Efficiency: 5.000 photos/80 minutes
Accuracy: Centimeter-level accuracy

Multispectral

NDVI
NDRE

APPLICATION

DJI Terra adalah perangkat lunak rekonstruksi model 3D yang menggunakan fotogrametri sebagai teknologi intinya. Perangkat lunak ini mendukung berbagai rekonstruksi 2D dan 3D cahaya tampak yang akurat dan efisien, serta pemrosesan data melalui DJI LiDAR. DJI Terra sangat cocok untuk drone dan muatan DJI Enterprise.

Surveying and Mapping

A groundbreaking aerial survey solution that takes automation and data utilization to a whole new level, delivering unparalleled cost benefits and efficiency to mapping professionals.
